The Potter's House Melville Church

Organisation Name: The Potter's House Melville

The Potter's House Melville is a Christian church that is in Melville in Johannesburg. Its focus is to reach people through spreading the Gospel of Jesus Christ. The church's desire is to help people to reconcile with God and have a relationship with Him as well as to live according to the Bible. It's also big on discipleship. Even though the organisation is mainly a church community, a website is a good approach to reach people in different locations for the church to grow. (The Potter's House Christian Fellowship Church, 2026)

The mission of the church is to basically, reach people with the sake of the Gospel and to also lead people to Jesus Christ so that they can grow. This is done through discipleship. The vision is for the Christian community to be developed in the community and to be built to be strong. It's where people can have an encounter with God, can feel a sense of spiritual growth and live a life that is filled with purpose for Jesus Christ. (The Potter's House Christian Fellowship Church, 2026)

The primary target audience are young adults, families, students, sinners, Christians, people who are looking for Jesus and people who want to attend a Christian church in Johannesburg, Auckland Park. (The Potter's House Christian Fellowship Church, 2026)

Website Goals and Objectives

The reason for the website is to bring people to God and encourage them to come to the church. The website needs to give the visitors proper information that is needed for them to know more about the church while they are engaging with the messages on the website.

Key objectives include:

It is for the awareness of the church to grow. It is to encourage new people to attend the church's services. It is to give more information about the times and location of the services. It is also to post sermons, to post testimonies as well as miracle video of what Jesus can do. It's to promote all and any church events like revivals and outreach. To also make it easier for visitors to get a hold of the church and to also motivate people to be more involved in the daily church activities as well as the discipleship part of things.

Key Performance Indicators (KPIs):

- It's to check the monthly website visitors.
- To check how many enquiries were submitted.
- To check how many enquiries there are, about the church services.
- To check the number of views on each of the sermons.
- Growth in social media referrals.

Current Website Analysis

Since the church doesn't really have a website, it relies on word of mouth, passing flyers and its social media pages.

The website will give it an opportunity to make it easier for people to find the church and to know more about the church because of the information provided on the website.

Features and Functionality of Website

The website has the following:

- A Home Page that's has a welcoming message, the vision of the church and calls-to-action.
- A About Us page which includes information about the church such as the history of the church, the beliefs, the vision and the mission of the church.
- A Visit Us page which states the details of the church, like the location, the times of the services, the address, GPS link and contact details.
- A sermon section which is the link to the YouTube channel.
- The events section which are the upcoming services, the concert, outreach times and dates the youth times and dates.
- Tithe and Offerings section where bank details are provided.
- Social Media pages where the links of the church's social media pages are provided.

Design and UX

The website should give a feeling of faith, love, hope, warmth, and modern church community.

The colours of the website:

Dark Blue #17213A

Light Orange #E4DCD1

Dark grey #121212

Grey #737373

(HTML Color Codes, 2025).

Typography:

For headings, we use the Trebuchet MS font. For body text, we will use the Amino font. For the buttons, we'll use the Trebuchet MS font.

The homepage should have pictures of the church, fellowships, and church activities. It should be easy to use. Important options like Home, About, Location, Events and Contact should also be there.

Tithes and offers should be visible as well. As for the times and dates of the church services.

Technical Requirements

We can create the website using HTML5, CSS, and JavaScript. The website must be able to be used on laptops, tablets, and mobile devices.

A .co.za domain, reliable hosting, an SSL security, backups as well as email accounts will be required. The South African pricing does show us that the .co.za domains on their own are likely to cost around R89 to R150 a year, and the hosting is different according to the functionality and the storage. (LaunchLlama, 2026)

Timeline and Milestone

Days	Activity
Day 1	Client research and requirements
Day 2	Sitemap and wireframes
Day 3	Visual design and branding
Day 4	HTML
Day 5	CSS
Day 6	JavaScript
Day 7	Content, sermons and events
Day 8	Testing and responsive optimisation. Client review and corrections
Day 9	Final deployment and documentation

Budget

Website design and development - R8000

Domain .co.za - R120 a year

Hosting - R1200 a year

SSL certificate - R0

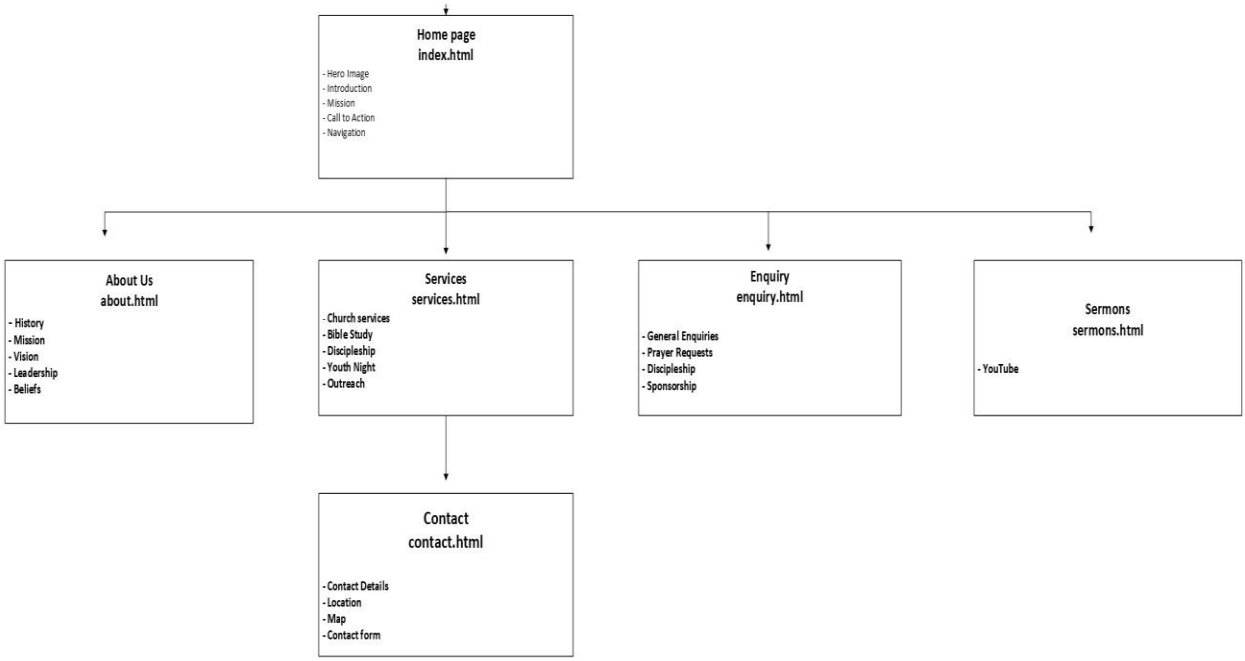

Content preparation - R1000

Maintenance - R500 a month

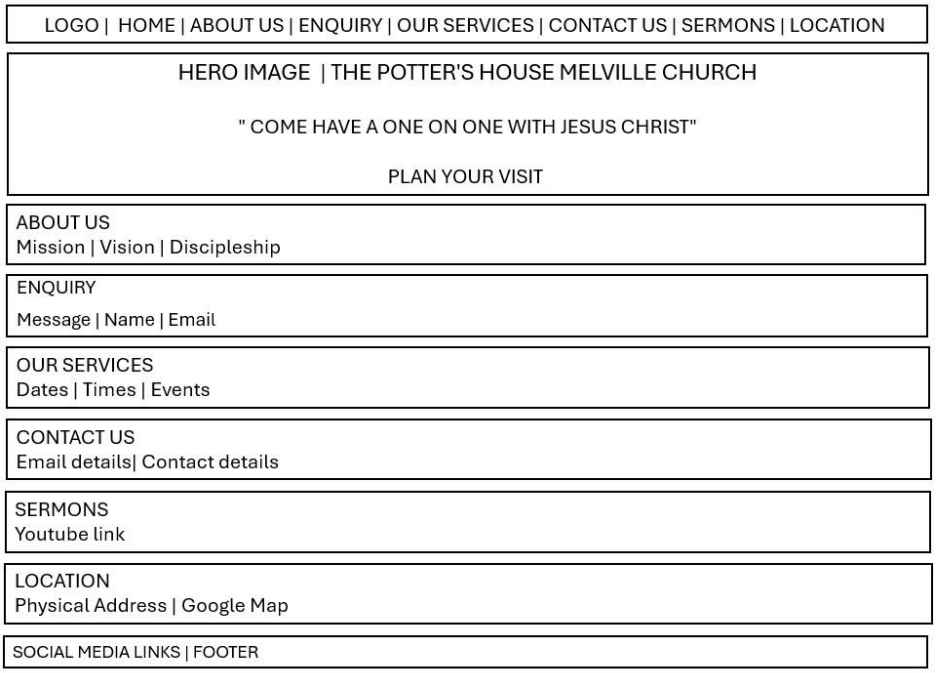

Estimated initial cost - R10 320
